WASTE MANAGEMENT & RECYCLING | HOOKWOOD | SITE SECURITY

Illustrative Servis security officer. Client account based on the supplied case study.

Site security built around a busy recycling operation.

Commercial vehicles, plant, materials and people move throughout the working day at Britanniacrest. Servis provides a visible security presence, with an approach designed to protect the site and support the controlled movement of employees, drivers, contractors and visitors.

01

Access and site presence

The service approach brings together identification checks, visitor and contractor control, delivery monitoring and visible security to help prevent unauthorised entry and suspicious activity.

02

Traffic awareness

Attention to access routes, pedestrians and operating plant supports safe vehicle movement. The priority is to help manage congestion and maintain the flow of daily site activity.

03

Incident support

Frontline support addresses alarms, accidents and suspicious activity, with appropriate escalation. The focus is on protecting people, property and the continuity of the operation.

OUR OPERATIONAL PRIORITY

A controlled, responsive security environment that supports day-to-day activity.
